

GATEWAY TO CARE MEDICAL RESERVE CORPS

MRC MONTHLY

October 2010

Note from the Coordinator

Dear Volunteers,

It has been quite a task to pick up where Shawn Henners left off. The position of Coordinator for the Medical Reserve Corps is exciting and rewarding! There is so much information to grasp....people to meet and places to go! I am pleased to announce that the HOSA chapter (Health Occupations Student Association) at De-Bakey High School has not only decided to continue its relationship with the Harris County Gateway to Care Medical Reserve Corps but has expanded its efforts to include the freshman, sophomore, and junior classes. So far, we have 12 existing students in the Jr MRC, a meeting scheduled to recruit two 10th grade classes, and a freshman waiting for five members to join him. I have included highlights from our first event we participated in—the Tour de Cure Event for Diabetes. I have also included pictures from a disaster presentation made to seniors at the Sunnyside Multipurpose Center. We have recruitment events scheduled for two of our major colleges within the next two weeks and expect to sign up additional volunteers. In the last three weeks, we have had twenty adult volunteers join the Harris County Gateway to Care Medical Reserve Corps. We look forward to continued success!

Lunetta

Thanks again for helping to make HarrisCounty a safer place to live!
